

TITUS® Corporate Overview

Security and Compliance Solutions

Importance of Securing Information

Information is an enterprise's most valuable business asset. Users generate thousands of emails and documents every day. Government and industry compliance requirements place a burden on organizations to monitor and regulate the content and recipients of this information. Implementing policy can help organizations meet these requirements, but without active enforcement of policy, organizations may experience an inadvertent or deliberate breach of sensitive data. This can lead to damages to reputation and brand image, compromised intelligence strategies, lost revenue, litigation and audits, as well as expensive eDiscovery.

User Education is the First Step

TITUS provides commercial off the shelf software applications that educate end users on information handling policy, prevent data breaches before users inadvertently make a critical mistake, and enable secure information sharing to comply with regulations.

Classify, Manage and Protect Email and Documents

As the classification market and thought leader, TITUS is focused on building classification and data protection solutions that make it easier for companies to secure valuable corporate information, as well as better manage and control corporate correspondence in emails and documents. TITUS software products complement enterprise data leakage prevention (DLP) solutions by allowing the end user to provide context and sensitivity to unstructured data. Because TITUS solutions apply metadata to all email and documents, server based DLP solutions can read this metadata, and limit the access and movement of any sensitive data.

With over 1.5 million users worldwide, TITUS software is deployed by military, government, and large enterprises to classify, protect, and share sensitive information. TITUS classification solutions provide enterprises with the ability to effectively manage email and documents for compliance. TITUS products ensure that your organization's sensitive data is handled appropriately by employees, customers, and partners.

Highlights

TITUS Security and Compliance solutions help organizations with:

- Data Loss Prevention
- Automated Protection of Sensitive Data
- Information Risk Management
- Data Classification
- Information Retrieval
- Policy Enforcement at the Desktop

Key Product Benefits

Prevent Data Loss Prevent users from sending sensitive emails and documents to inappropriate recipients or large distribution lists with pop-up warnings.

Increase Accountability Force users to stop and think about the business value of their emails and documents before they can be sent, saved or printed.

Simplify Encryption Prompt users to select a predefined classification label based on business value (ex. Internal Use Only) which automatically triggers encryption, like Microsoft AD RMS.

Raise Awareness Instantly alert recipients to the sensitivity of information with visual markings in emails and documents.

Ensure Compliance Support internal and government protective marking regulations for email and documents.

TITUS Family of Security and Compliance Solutions

Classification

TITUS messaging and document solutions help enterprises enforce their classification policies and prevent inadvertent disclosure of sensitive information.

- **TITUS Message Classification™:** Classifies, labels, and protectively marks email in Microsoft Outlook®, Outlook Web Access, and mobile devices.
- **TITUS Classification™ for Microsoft Office®:** Classifies, labels, and protectively marks documents in Microsoft Office® Word, Excel®, and PowerPoint.
- **TITUS Classification for Desktop™:** Enables the classification of any file type.
- **TITUS File Server Classification:** Classify and label documents on Windows Server 2008 File Classification Infrastructure to protect information assets.

Aware for DLP

By involving the users as part of the DLP process, TITUS Aware enhances Enterprise DLP solutions by reducing false positives that cause costly business disruptions.

- **TITUS Aware:** Prevents email data loss by bringing user driven security to the desktop, where users are educated on security policy and given the ability to remediate potential data breaches before they happen in Microsoft Outlook.

SharePoint Security

TITUS solutions for Microsoft SharePoint provide enhanced security, document labeling, automatic PDF conversion, and Office 2007 format conversion for organizations using SharePoint document libraries and lists.

- **TITUS Metadata Security for SharePoint:** Protects information in SharePoint based on metadata properties. Access to documents and list items can be based on the item's metadata properties.
- **TITUS Document Marking for SharePoint:** Applies labels and watermarks to existing and new Microsoft Office and PDF documents in order to raise the awareness of sensitive information and achieve compliance.
- **TITUS PDF Control for SharePoint:** Automatically generates PDF versions of Office documents to facilitate sharing of information and to produce a document format appropriate for archiving.
- **TITUS Document Converter for SharePoint:** Converts Word, Excel, and PowerPoint documents in SharePoint to Office 2007 format, thus enabling standardization on a single file format and minimizing compatibility issues.

Fully Customizable and Easy to Integrate

TITUS' software solutions are fully customizable to specific customer requirements and can be easily integrated with third party content security products that customers already have in place.

TITUS solutions also complement enterprise data leakage prevention (DLP) strategies by embedding user selected classification information into email and document metadata. This metadata is easily detected by commercial DLP products, enabling richer information security management controls that go well beyond pattern recognition by allowing the author to specify the content's sensitivity and handling requirements.

Setting the Industry Standard

TITUS sets the industry standard for email and document classification. We have garnered an extensive roster of blue-chip international clients in the banking, financial, police, and military sectors, in addition to a host of federal government clients around the world. United States Air Force, US Department of Veterans Affairs, NATO, Canadian Department of National Defence, Australian Tax Office, Dow Corning, United States Air Force, NATO, G4S, Paternoster, Pratt and Whitney, Australian Department of Defence, and the U.S. Department of Veterans Affairs are among those that have selected TITUS' products to help manage their security and compliance needs.
