

DATASHEET

Today's military and peacekeeping missions are highly interdependent. Multinational forces work side by side, and conventional forces work closely with national agencies, local governments, non-governmental agencies, and others. To function as an integrated team, these groups must be able to share information securely, quickly, and effectively, while ensuring that secrets are not leaked out.

To enable effective and secure information sharing, military organizations have historically relied on visual classification markings. But without a tool to enforce classification and automate the application of markings, users can apply markings inconsistently and incorrectly; increasing the risk of data spillage and inadvertent disclosure. Furthermore, legitimate information sharing is hindered due to cross-domain guards and rule sets rejecting the improperly formatted information.

Titus Classification for Military is an easy-to-use classification and policy enforcement solution that ensures all Microsoft emails and documents are classified and protectively marked before they can be saved, printed, or emailed. By ensuring properly marked content, the solution helps to promote cross-domain sharing and reduce spillage of classified and sensitive information.

Titus Classification for Military easily integrates into defense environments to immediately enforce compliance to information protection policies. The solution provides an unobtrusive method for user-driven classification as well as machine learning detection capabilities to streamline workflows while educating end users.

HIGHLIGHTS

Titus Classification for Military is a marking and information protection suite of tools for Microsoft Office (Word, Excel, PowerPoint) and Microsoft Outlook. The solution helps organizations:

- Comply with military marking standards
- Protect PII and other sensitive information
- Automates handling instructions
- Confidently share information within the mission environment

SYSTEM REQUIREMENTS

Titus Military Classification works with:

- Windows 7, 32- or 64-bit SP1
- Windows Server 2008 R2 SP1, 64-bit
- Windows Server 2012 R2, 64-bit
- Windows 8.1, 64-bit
- Windows 10, 64-bit

Military-compliant visual markings in Outlook

TITUS Military Classification Solution

KEY FEATURE	BENEFIT
Unlimited labels	Allows for unlimited classification labels, enabling organizations further customization for business regulation and compliance.
Signed trusted labels	Higher level of assurance that labels have not been tampered with through cryptographical binding.
Classification selector	Provides simple, non-intrusive ways for users to identify email sensitivity. Users are guided through the classification process with prompts and suggestions to increase accuracy and efficiency.
Visual markings	Applies military-compliant visual markings in the form of headers, footers, watermarks, and classification authority blocks to clearly identify information sensitivity.
Portion marking	Applies classifications to individual portions of an email, and automatically upgrades the email classification to the highest portion marking in the email. A Portion Mark can be defined at many levels, such as a paragraph, table, or image.
Metadata assist	Stores user classification selections with the document as persistent metadata, which can be used to increase the accuracy and effectiveness of DLP, archiving, and perimeter security solutions.
Policy enforcement	Inspects email for sensitive content such as PII and provides immediate feedback so that the sender can correct any problems before the email leaves the desktop.
Security enablement	Adds an extra layer of security by automatically encrypting, signing, or RMS-protecting sensitive emails based on classification, recipient, content or any other email attribute.
Administration	Provides a centralized, web-based Administration Console for classification, configuration, and policy management across the entire Titus Classification Suite of products. Titus generates user activity logs that can be monitored and analyzed to measure the effectiveness of the security policies.

About Titus

Titus is a leader in providing solutions that enable businesses to accelerate their adoption of data protection. Millions of users in over 120 countries trust Titus to keep their data compliant and secure, including some of the largest financial institutions and manufacturing companies in the world, government and military organizations across the G-7 and Australia, and Fortune 2000 companies. To learn more about how Titus can help with CUI and CNSI marking and metadata programs visit www.titus.com.
